## NEWS RELEASE

### **Pre-Feasibility Study Underway at Tintina's Black Butte Project**

Vancouver, BC – January 28, 2015 - Tintina Resources Inc. (“Tintina” or the “Company”) (TSX.V:“TAU”; OTCQX: “TINTF”) is pleased to announce the commencement of a pre-feasibility study at the Black Butte Copper Project, Montana, USA.

Tintina has recently commenced a pre-feasibility study for development of the Johnny Lee deposit. This work will define the optimal development scenario for an underground mine, plant site, infrastructure and environmental safety. The study will incorporate a thorough analysis of all aspects of the project and will incorporate information from extensive hydrological studies, water balance studies, fish and wildlife studies, as well general engineering studies, and will include a carefully considered closure plan.

The study will be compiled by a number of independent, highly reputable consultant groups from throughout North America with the leading engineering firm Tetra Tech coordinating the studies.

Mr. Bruce Hooper, CEO commented “We are very pleased to have appointed a high caliber team to rigorously evaluate the development of the Johnny Lee deposit. The pre-feasibility study will support an application for a Mine Operating Permit, which we anticipate completing in 2015.”

Mr. Jerry Zieg, VP of Exploration added, “The participation of high quality groups at the pre-feasibility level will assist our continuing efforts to define a project that reflects the values of our community, which is critical to a successful project. These studies will bring us another step closer to bringing 200 family wage jobs to Meagher County.”

#### **ABOUT TINTINA RESOURCES INC.**

[Tintina Resources](#) Inc. is a growth company focused on the exploration, development, and mining of its 100% owned flagship property, the Black Butte Copper project in central Montana, USA. The Company is led by a highly experienced executive management team that has a successful track record of building shareholder value through exploration, corporate finance, and mine development.
